

Patient Name: Caleb Adams
Date of Admission: November 13, 2023
Medical Record Number: 6789035

Subjective:

- A 32-year-old male presents with complaints of persistent heartburn, regurgitation, and difficulty swallowing.
- Symptoms worsen after meals and when lying down.

Observation:

- Gastroscopy reveals a hiatal hernia and esophageal erosions.
- Esophageal manometry confirms impaired lower esophageal sphincter function.

Assessment:

- Gastroesophageal reflux disease (GERD) with associated hiatal hernia.

Plan:

- Proton pump inhibitors will be prescribed to alleviate symptoms.
- Lifestyle modifications, including dietary changes and elevation of the bed, will be recommended.

Attending Physician: Dr. Ethan Miller
